

Don't pour fats, oils, and grease (FOG) down the drain.

FOG can wreak havoc on the pipes in your home and create clogs in Alexandria's sewage system. Instead of pouring FOG down the drain, just can it. Keep a canister with a lid next to the sink - an old soup or pet food can will do the trick - and simply pour the FOG into the can. Once these substances have hardened, you can throw them in the garbage with other solids.

Include a FOG plan in your recipe so you can protect your pipes, and ours!
